

Benefits

BENEFITS OF RECYCLING PLASTIC FOAM

* Processed plastic foam is re-used to create new products made of plastic like Shoes, Garden Pots, Photo frames, Automobile parts, ect.

* We help save valuable area within the country's landfills, plastic foam takes lots of space and doesn't compress well also takes over 500 years to decompose.

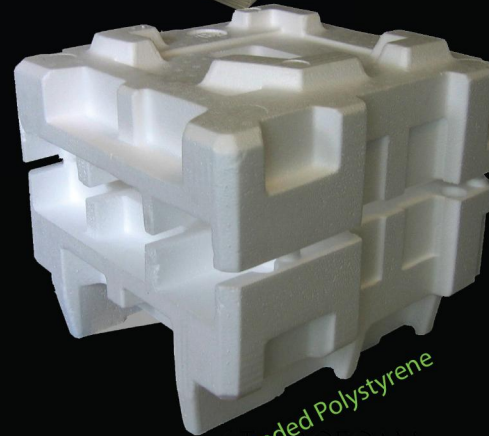

* Recycling of Styrofoam can help companies, government agencies and businesses **SAVE MONEY** in their waste hauling costs, but also generate an income, from processing plastic foam materials with Recycle Tech's Foam Densifiers.

* Save up to 80% annually in disposal and waste hauling fees!

Our Company

Our Company

will buy back 100% of the densified foam material and we pick it up!

Expanded Polystyrene

JIRAH

General Contractors
& Consulting, Inc.

Recuperation & Recycling of
Styrofoam And Other Types
of Plastic Foams

One of a kind SERVICE

Styrofoam is a type of plastic that is used in a variety of applications from food containers, to appliance packaging, to building insulation. But not everyone recycles it...

For all PR and most of America, this material get tossed into the garbage and hauled to the nearest landfill.

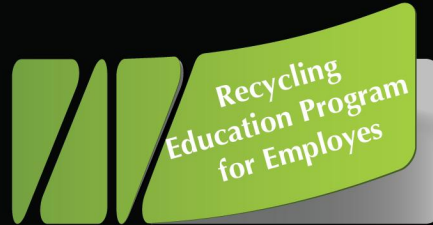

In Puerto Rico, the Yo Reciclo Program from JIRAH General Contractors & Consulting, Inc. (JGC&C), is the only company to implement for the first time, the recuperation and recycling of this material with the purpose of reducing waste hauling & disposal costs to businesses, government and private organizations and help manage this terrible environmental problems in PR and the Caribbean.
